

Reference Letter

Since September 2022, MPED LTD has been in collaboration with the Coface Group entities across Central and Eastern Europe. Throughout this period, the company has taken charge of developing and maintaining systems for the automated verification of BIK borrowers, encompassing:

- Customer Control System
- Customer database system (with integrations and advanced search capabilities)
- Integration module with an external anti-fraud system
- System for automatic periodic customer verification
- Additionally, MPED LTD has pioneered the MVP development for an automated system that retrieves, processes, and transmits registration details of businesses in the National Court Register, Civil Partnerships, sole proprietorships, and financial statement data.

MPED LTD has also performed a comprehensive audit of all Coface's solutions and infrastructure, crafted an architecture diagram, delivered a thorough description of the current situation, and provided a series of recommendations for future actions. This collaboration period has enabled MPED LTD to accumulate specialized "know-how" in the industries of receivables, risk insurance, factoring, and debt collection. This expertise allows them to suggest, craft, and execute innovative solutions, as well as recommend changes in functionality and infrastructure that lead to process automation, enhancements, and effective problem resolution.

We are extremely pleased with the dependability of the services rendered and endorse MPED LTD as a firm renowned for its vast knowledge, unwavering dedication, and adherence to deadlines in fulfilling the programming tasks entrusted to them.
